Professional Summary

Computer Science and Engineering undergraduate specializing in Gaming, Graphics, and AI-based systems, delivering end-to-end projects including web applications and Unity 3D games, using Java, C#, Unity, Python, SQL, Git, Linux, REST APIs, and basic AWS/cloud concepts, with strong foundations in Data Structures & Algorithms and Object-Oriented Programming.

Education

B.Tech in Computer Science and Engineering, UPES, Dehradun | CGPA: 7.56/10
12th, Shivalik Gurukul, Ambala | Percentage: 78.40%
10th, Silver Bells Public School, Shamli | Percentage: 74.00%

Jul 2023 – Till date
Apr 2021– Mar 2022
Apr 2018– Mar 2019

Technical Skills

- **Programming/Scripting Languages:** Python, C++, Java
- **Databases:** SQL,
- **Others:** Git, GitHub, Figma, Blender

Internships

DBR Pvt. Ltd., Noida – Intern |

Duration: 8 Weeks

June 2025 – July 2025

- Developed a Machine Learning–based House Price Prediction model using Python and regression techniques, strengthening skills in data preprocessing and model evaluation.
- Analysed and validated datasets through cleaning and structured data entry, improving data accuracy and consistency.
- Designed marketing pamphlets and promotional materials to support business outreach and communication.

Hamari Pahachan NGO – Intern|

Duration: 8 Weeks

June 2024 – July 2024

- Assisted in website development and digital optimization initiatives to improve NGO visibility and engagement.
- Planned and created structured digital content and promotional campaigns to enhance outreach and donor interaction.
- Supported data organization and reporting activities, ensuring accuracy in documentation and campaign tracking.

Projects

- Lost and Found Management System | May 2025

Tech Stack: Java, Spring Boot, HTML, CSS, JavaScript, SQL

- Developed a web-based application enabling students to report, search, and claim lost or found items with secure authentication.
- Implemented user login, password recovery, and item claim verification with image upload functionality.
- Designed backend services using Spring Boot and integrated REST APIs for efficient data handling and database operations.

- Geometry Dash–Style 2D Game (Unity) | 2025

Tech Stack: Unity 3D, C#, NavMesh, Raycasting

- Developed a 2D rhythm-based platformer game with multiple player modes including cube, ball, ship, wave, and spider
- Implemented physics-based movement, gravity switching, collision detection, and raycasting for obstacle interaction.

Certifications & Accomplishments

- **PwC Advisory Launchpad Learning Program** Feb 2026 – Present
Selected for PwC's structured advisory learning program, gaining exposure to consulting fundamentals, business problem-solving, data-driven decision-making, and professional practices through industry-aligned coursework.
